

Homecloud

Private Storage.
Simplified.

Storage for **everything**. At your home.

What it does?

Automatically backs up Photos, Videos from Phone.

Extend laptop storage with network drive to store large video files; edit from anywhere. Share with family, team.

Never loose any document with Click, Scan and Store feature to import documents from phone. Organize with tags and quickly search

Stop forgetting passwords. Securely store and share important (always updated) passwords like for insurance, banking websites with family. Integrated with phone, browser for auto fill and retrieval.

Protect laptops against accidental file deletion, ransomware, hardware failures with automated laptop backup software

Store your personal video,music,audio books library for Netflix like streaming across devices

Made for sharing - Unlimited user accounts. Share with family, friends and teams.

Access your USB drives online - USB drive data is now accessible from your phone, laptop.

Stores your private notes and confidential data encrypted and secured.

Keeps your digital life private. Data always stays in your device with NO backdoor access. Access securely from anywhere with integrated VPN.

Getting started

Homecloud is available in 2 editions:

Physical Appliance: Ready to use appliance with 1/2/4 TB super-fast NVMe SSD storage. Just connect it your Internet router, configure in few steps and your personal, private cloud is ready.

Order Homecloud device at: homecloud.cloud

Virtual Appliance: If you have an laptop/computer with enough storage this virtual appliance is for you. Setup in few easy steps to have your own private cloud accessible from anywhere.

And the best part is it is FREE. No license or usage restrictions. Use it forever as your private cloud.

Setup Virtual Appliance in easy steps

What you should have?

To use Homecloud Virtual Appliance you need a computer with: 2 vCPU, 4 GB of free Memory, Free disk storage of at least 100 GB + additional as per your storage needs.

Let's get started

Step 1: Install Oracle VirtualBox on your computer. Download from:

<https://www.virtualbox.org/wiki/Downloads>

Step 2: Download Homecloud Virtual Appliance (OVA file) from:

<https://repo.homecloud.cloud/virtual-appliance/>

Step 3: Import appliance in VirtualBox by double clicking on OVA file and following the wizard. You can also go to VirtualBox and File->Import Appliance and select the downloaded OVA file.

Step 4: After importing, start the VM. Once started, configure Homecloud using wizard.

Access it using link in your web browser (Chrome, Firefox): [Login to Homecloud](#)

(Accept any SSL/certificate related security warnings)

Login details:

Username: admin

Password: homecloud

Follow the wizard to setup suite of trusted apps on your appliance.

Homecloud makes it easier to deploy trusted, opensource apps. These apps are community supported and are trusted by millions of users globally. Homecloud enables quick deployment of these apps and also provides automatic updates.

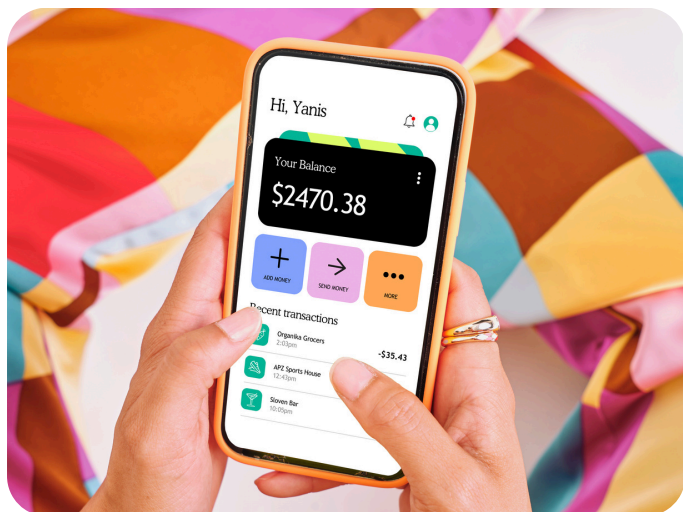

Here is the list of apps that are available on Homecloud (this list keeps expanding and new apps automatically gets enabled for users)

Integrated Apps available on Homecloud	Uses
Immich Photo App	App to take backup of media from iPhone, Android phones. Also accessible over web interface from any computer.
Paperless-ngx	Document organizer to easily scan document from phone. Convert image characters to searchable text. Organize with Tags.
Vaultwarden	Password Manager for storing and sharing passwords securely
Jellyfin	Watch or listen to your personal video and songs library from anywhere on mobile device
Joplin	Store your personal notes and confidential data encrypted on your Homecloud device
Drive	Online network drive for storing, editing and sharing large video files, documents, any files.
UrBackup	Automatically schedule and take backup of your laptops.
Duplicati	Protect your Homecloud data by keeping a secure copy of your data on public cloud or USB drive of your choice. Backups are encrypted so no one else can access your data.
Tailscale	VPN service for securely accessing Homecloud from anywhere. Requires free sign-up of this service.

After Homecloud appliance is configured, install Tailscale VPN and other apps (e.g. Immich, Paperless etc) on your access devices like iPhone, Android phone and laptop.

Homecloud will be accessible on these access devices from any location. VPN ensures only authorized devices can access Homecloud.

Why use Homecloud?

Easy to use and High Performance Storage

Get started in few minutes with guided deployment. No technical skills needed to operate.

Unlike public cloud storage - Homecloud is based on high performance NVMe dedicated storage.

Private and Secure

Easily deploy trusted open-source apps. All data resides only on your device with no backdoor access to anyone.

Automatic on-air updates of all apps.

Cost effective

Free of cost Virtual Appliance.

Hardware Appliance costs **₹4,284 for 2TB per year***

Must have for content creators and families with large storage needs

Content creation requires high performance storage for video editing and publishing. Homecloud is ideal for content creators for storing, editing and viewing their files on network from anywhere.

With unlimited user accounts - families can get private storage for each member at a cost effective price. With complete data control and privacy - all sensitive data (unlike public cloud) can be securely stored.

Extend your laptop(s) storage with online network drive for each laptop.
